

WHAT DOES THAT LIGHT MEAN?

Is this something I can fix or do I need to bring it to BusWest?

BusWest is proud to offer OEM software and the specialized hardware you need to read and diagnose issues on your entire fleet (Thomas, Freightliner, Blue Bird, or International). Allison DOC, Wabco Toolbox Plus, Cummins Insite and Detroit DiagnosticLink software subscriptions are all available from BusWest.

In addition we have the hardware to connect it all together including Nexiq USB Link-3 adaptors and Panasonic Toughbook FZ-55 Ruggedized Laptops.

Contact your BusWest parts sales person to discuss how we can help you work more efficiently and effectively in your shop with your own software and hardware.
